

Crystal Pacific Windows Give New Outlook for Medical Center

- So. California Manufacturer Supplies New Windows for St. Bernardine Facility Renovation -

RIVERSIDE, CA, July 21, 2016 – Crystal Pacific Window & Door Systems recently supplied over 100 new energy efficient vinyl replacement windows for the St. Bernardine Radiation Therapy Center, part of St. Bernardine Medical Center in San Bernardino, CA. The Crystal Pacific Vista Vinyl windows were fabricated on a fast track schedule to meet the medical center's renovation project requirements.

Crystal Pacific recently supplied new fixed picture and custom shape arch vinyl windows for the St. Bernardine Radiation Therapy Center, on the campus of St. Bernardine Medical Center, San Bernardino, CA. The historic building was once the convent for the religious order that founded the hospital in 1931.

"We were very pleased to be part of this project and worked closely with the installation company Hour Glass & Mirror, which is one of our dealer customers, to achieve the architectural look the medical center wanted," said Fernando Escareno, Crystal Pacific Account Manager for this project. "This was an excellent demonstration of Crystal Pacific's ability to respond quickly to trade customer requests. Hour Glass asked us to step in on very short notice and provide a sample that met the owner's specifications when another supplier was unable to. Crystal Pacific built and delivered the sample overnight for the St. Bernardine Medical Center construction team's review. Ultimately, Crystal Pacific was selected for our responsiveness as well as the quality of our windows."

Crystal Pacific supplied 121 large Vista Vinyl picture windows and custom shape circle top windows in extruded white finish to replicate the original style of the building. These windows feature 3-1/4" frame depth with multi-chambered frame design for strength and beauty, and block frames to facilitate

installation. The ¾" dual-pane insulated glass units feature Cardinal LoE² (low-E coated) glass and Intercept[®] spacer systems for excellent energy performance in all climates. Between-the-glass flat profile grids simulated the divided light look of the original windows.

The St. Bernardine Radiation Therapy Center is located in San Bernardino, CA on the campus of the 342-bed non-profit acute care hospital St. Bernardine Medical Center. It is in the historic building that was once the convent for the local order of the Sisters of Charity of the Incarnate Word, which was instrumental in the hospital's founding. The convent is in the style of classic Mission Revival Architecture, with red tile roofing and elaborate architectural detail.

A regional manufacturer launched in 2012, Crystal Pacific continues to expand its product lines and capabilities. The company offers quality, energy efficient high-end vinyl windows in every style – hung, sliding, casement, projected, fixed, and special shapes – as well as sliding patio doors and fiberglass entrance doors. Crystal Pacific window products may be finished in standard white or clay, or owners may choose a custom color paint to complement most exterior façades. Products for commercial and other applications are planned and will be available soon.
